White Fir	Abies concolor	20-30'/30- 60'/moderate	This tree likes moist well-drained soils, similar to blue spruce.

Species Not Recommended

Aspen (Populus tremuloides)	Has many insect and disease problems that are generally not present in Native Mountain areas.
Austree (Salix alba X Matsudana)	Extremely weak wooded, often sold through mail order as a miracle tree that it is not.
Birch (Betula species)	This tree does not do well in Colorado climate as it once did.
Boxelder (Acer negundo)	Female tree attracts Boxelder Bugs that invade houses and can become a nuisance.
Ash (Fraxinus species)	Susceptible to Emerald Ash Borer and potential for devastating loss similar to Dutch Elm Disease of Elm trees.

Cottonwood (Populus species) Cotton is a high nuisance on cotton bearing

trees, Cottonwoods also tend to be very weak wooded, good tree for large open

spaces.

Hopa Crabapple (Malus species Hopa) This tree has very high susceptibility to the

bacterial disease fire blight. Pick a Crabapple species that has low

susceptibility.

Mountain-Ash (Sorbus species) Very susceptible to Fire Blight.

Russian Olive (Eleagnus angustifolia) Invasive nuisance tree, on Colorado

Department of Agricultures list of noxious

weeds.

Siberian Elm (Ulmus pumila) Extremely weedy and invasive, seeds

profusely. Very rapid growth creates

extremely weak wood.

Silver Maple (Acer saccharinum) Very weak wooded tree.

Tamarisk (Tamarix species) State Department of Agriculture noxious

weed list, extremely invasive.

Tree of Heaven (Ailanthus altissima)

Very rapid growth creates weak wooded

tree, can be very invasive.

Willow (Salix species) There are many kinds of willows, this is a

weak wooded species which can be

potentially hazardous placed in the wrong location. Typically after most rain or wind storms twigs or branches will be on the

ground.
